

Design & Materials

Design and engineering are intertwined in every KLEEMANN project. The collection of textures and materials for cabin design presented here, offers creative tools for solutions of aesthetic excellence that cover all engineering prerequisites and adapt to European Standard EN81-20.

We design passenger experiences

Creative power

Design has to integrate reality, foresee tomorrow and create an elevated user experience. Rather than thinking of an elevator as a box that moves, we see it as an active social space in a building, that is used and lived by people.

Industrial designer Andreas Zapatinas joined the creative forces of KLEEMANN in 2007 and new technical and aesthetic solutions have been explored. Since then, the experienced KLEEMANN Design Team has build on these fundamental ideas taking KLEEMANN lifts to the next level.

Design options Cabins

Purity

Purity cabin, the new addition to the standard range, combines **optimized construction and upgrade of materials** with simultaneous reduction of cost and installation time. **Easy installation from inside the cabin**, minimal design with **no visible screws**, and **new packaging** that minimizes installation time, are just few of the advantages that make Purity a high-quality cabin, ideal for your lift.

Advantages

- Reduction of installation time by 20%
- Cost reduction thanks to optimized construction
- Improvements in aesthetics & materials

Optimized construction

- No openings & curves on side panels
- New ceiling with LED panel
- New design for easy replacement of lighting
- No visible screws on ceiling, car operating panels & sill
- Easy installation from inside the cabin
- Same construction for all car sling types
- Reduction of total ceiling height
- New packaging

Customized Design Expertise

KLEEMANN enjoys a favorable worldwide reputation for its customized design expertise.

With a wealth of experience gained from demanding projects, KLEEMANN excels in tailor-made solutions for unique requirements.

Alongside a diverse range of standardized cabins, KLEEMANN provides reliable, efficient, precise, and cost-effective responses to any specifications.

KLEEMANN Design Package

The KLEEMANN design service package is a three-part process that promotes creative communication among all project stakeholders, allowing exploration of new design ideas, products, and materials to enhance overall performance and quality standards.

- Analyzing and understanding the technical and aesthetic requirements of the project.
- Providing architectural collaboration and guidance in designing cabins, doors, operating panels and tiling of the lift.
- Creating customized proposals through 3D photorealistic renderings, to ensure that the final design meets the client's expectations

Real Project

3D Rendering

At KLEEMANN, a dedicated Design Team serves as the driving force behind the development of custom cabins for even the most challenging projects.
