

COLTSON TOWER, BRISTOL

ALDER KING

PROJECT DETAIL:

2 x 17 floor 1275KG, 17 person Top Drive Traction Passenger Lift at 3.0m/s.

This project was to replace the existing lifts within the tower and Podium Building. Over the years, the buildings use has changed from single to multi occupancy offices and this has put very high demand on the only two lifts in the tower. HOISTWAY replaced the 2 x 2.0m/s 1050kg lifts with 2 x 3.0m/s 1275kg lifts and added their Direct to Floor Control to both of these lifts to increase efficiency and minimise landing waiting times.

BUILDING TYPE:

Multi Occupancy Offices

CLIENT:

ALDER KING / RESOLUTION PROPERTY
